

# Unique Compact X-Ray Inspection System

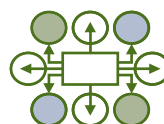

World leading quality portable x-ray system

Easy setup & quick results – safely explore IEDs in minimum time & risk

Field design for security needs – battery operated system, robust and reliable

Solution for any situation – line of accessories for every need

## Compact, Lightweight System that Packs a Punch in Quality

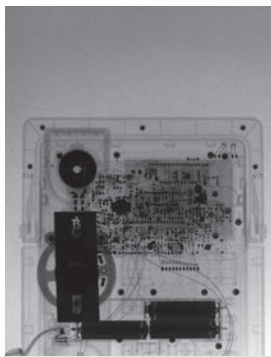

With a physical size of only 195 x 125 x 35 mm (7.67 X 4.92 X 1.37”, not including the handle) and a weight of about 1.5kg (~3.3lbs) this super mobile imager provides the smallest and lightest solution. Despite its small dimensions, the BoltX offers the best imaging resolution with the smallest pixel size in the Vidisco systems line – just 75 microns. With its physical attributes and Vidisco’s plug

& play principal, the BoltX is a popular choice as a ‘chaser configuration’ addition to another complete system. This option essentially provides the user with 2 imagers available for work, to be used based on the physical requirements of the setup, necessary detail level required in the image etc... The BoltX is also available with WiFi options and a variety of accessories.

# BoltX Explore, Detect, Go

1Pulse Image

After just 1 click

Simple to operate enhancement features include 800% zoom, Window Leveling, Adaptive Histogram, Stitching, Dual Energy Probe, Sharpening, First image restore option and more.

Comprehensive Database - X-ray image records include external images, automatic info, easy search & sharing, while keeping your information safe in a special file format and on the operator's laptop.

- ✦ Intuitive software interface designed for real-users
- ✦ Minimal time & steps between you and getting the image you need to see
- ✦ Best one-click tools to get clear visuals with minimal x-ray dose
- ✦ Easy to use, flexible image management

## BoltX Technical Specifications

Specification**	BoltX
Imaging Area:	145x114 mm (~5.7x4.5 inch)
Imaging Area Position:	6 mm from bottom & sides
Imager Size:	195x125x35 mm (h,w,d) (~7.6x4.9x1.3 inch)
Imager Weight:	1.5 Kg (~3.3lbs)
Resolution:	6.6 lp/mm
Dynamic Range:	14 bit (16,384 Grey levels)
Pixel Size:	75 µm
Battery Operation:	Over 5 hours
Optional Accessories:	XR-DE Plus: Dual Energy Module for Organic/Inorganic Detection WiFi X: Digital Wireless System: connecting laptop to ICU/imager 300m High Power WiFi option: up to 1500m (~1 mile) line of sight WXR: wireless X-ray – eliminates cable connection to X-ray Extension Cable: up to 200m distance DC/AC Car Inverter: for unlimited power supply from a vehicle – power down the line External Camera: for external color images & video
Software:	Advanced proprietary Xbit software for security operators
