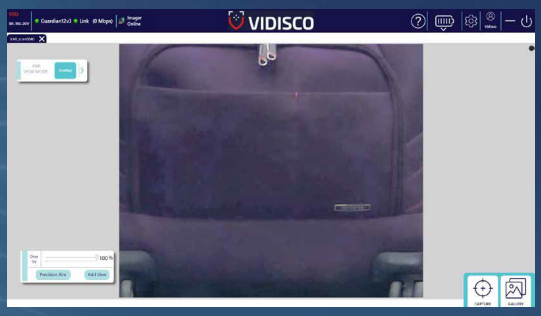
VIDISCO

# DISCOVER WITH CONFIDENCE



# Hawk Pro

A novel, proprietary & patented Vidisco technology allowing for the disruption of targeted critical components within an IED/Ordnance item. Using a gimballed targeting laser, enhanced imaging software, and a few other components, the EOD Technician can now acquire the precise firing solution required to perform highly accurate and consistent render safe disruption techniques.

## Compatibility

Designed to be used with the Vidisco's X-Ray System

## Safety

Enhances render-safe capability. Easy set-up, rapid deployment

## Virtual grid

Automatic, rapid and precise target acquisition (1.5 mm accuracy)

## Augmented reality

Platform offering X-Ray with Optical Overlay in real time

## Workflow

Integrates to the Grid Aim Kit currently use by most EOD/Bomb squad teams, fully compatible with XTK
