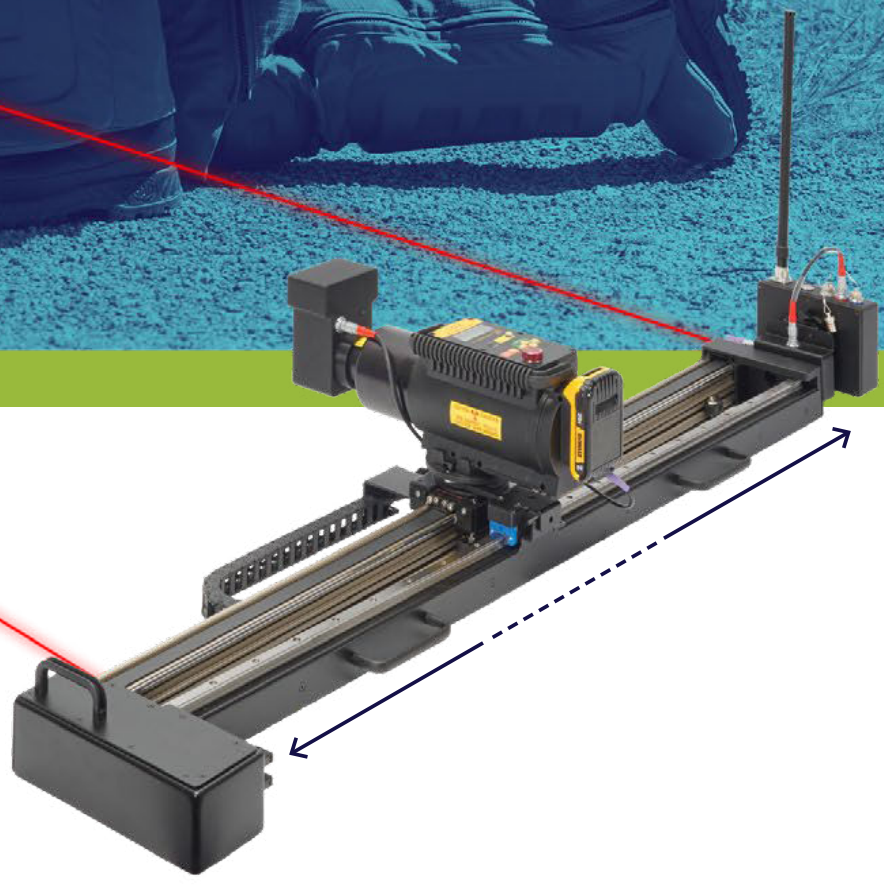
VIDISCO

Discover depth perception with **Vidisco's XAR** augmented reality X-ray solution



Discover New Dimensions with Vidisco XAR threat detection!

As threats become more challenging and sophisticated, Vidisco XAR helps EOD & IED units stay one step ahead!

An Augmented Reality (AR) X-ray image in a real-world environment

With one downrange approach, the operator can see the object from several points of view and receive a multi-layer, X-ray, optic (real world), and combined image.

Vidisco XAR enables the detection of the internal object components and location and acquire deep learning data in realtime.

This groundbreaking solution is ideal for IED disruptive procedures as well as threat detection training.

This solution complements Vidisco's existing portable systems.

DISCOVER WITH CONFIDENCE

- AR imaging in a real-world environment
- Easy setup
- Operate directly from case
- 3D Measurement capabilities
- Multi-layer image
- In-depth & accurate data and analysis
